- o Top-Notch accomplishment with down pour rain/hail /lighting as they removed brush, tree and installed extension of shooting line. Returning to level topsoil and seed area when it dry up a bit (mid July).

Range Coordinator:

- Four (4) targets were rebuilt for the static range (Thx DW). All targets with angle iron have been fitted with wood (2x4) arrow guards. I'm currently experimenting with a combination ballistic nylon and high compression foam for a lighter/stronger solution to the arrow guards.
- Shipment of new target material was received from BB Targets. Material quantity is sufficient to build (16) new target butts. Some members have requested material to build their own targets. Material can be purchased for \$80/ft. (16x48x12).
- Steve M. has done a good job updating range #2 with newly painted yardage markers. Range # 1 still needs a few markers painted. New target # signs have been placed on many of the station of all ranges. Strong work to whoever made those signs. Additionally, many of the seat/bow-hangers have been updated with new seats.
- The project to expand the Olympic Range really looks nice. Additional targets are being ordered to fill up the range. Thanks Steve P. and Scotty.
- Some members have requested a 110 yd shot on the static range. It is currently ~99yds from the shooting line. There is room behind the target if we would like to push back the berm. Thoughts are to build the target stand on rails and make it adjustable from 90-110 yds. More to come.
- No significant issues with any of the field archery ranges. The rains have exposed some areas that could use some erosion mitigation.
